PROJECTS

Automatic Question Generating system   **October 2024**
Natural Language Processing

- We used Bart and T5 pretrained models to generate ranked questions based on the input by the user.
- User can give pdf, Image or normal text as a input.
- We used two publicly available datasets Squad, and Sciq

Skin Disease Classification   **October 2024**
Machine Learning

- We used VGG16 and NASNet pretrained models to classify skin disease.
- Achieved 89% and 91% of accuracy to for VGG16 and NASNet, respectively.
- We used a publicly available dataset from Kaggle skin disease dataset.

Gearshift   **March 2024**
Web design Project

- We used HTML, CSS and JavaScript to develop this project.
- We used form validation using JavaScript and MySQL for data storage.
- Created Login System using Firebase.
